

AIMS OF THE GROUP

The group aims to monitor waders using the Wash to provide a better understanding of their biology. This will allow decisions which may affect these waders to be taken in the light of factual information.

Work concentrates on 11 target species studying:

- the patterns of migration and origin of each species and any known populations;
- the importance of the Wash as a whole;
- the importance of sub areas of the Wash;
- the use of biometrics and other techniques to understand how birds use the Wash;
- long term population dynamics.

REPORT

The biennial report is circulated to all members. Couples receiving only one copy of the report may make a larger contribution at their discretion.

ANNUAL SUBSCRIPTION RATES

- £6 Waged
- £4 Unwaged
- £1 Temporary - payable per trip for insurance cover.
